Barb Irwin  
Illinois Power Company  
500 S. 27th Street  
Decatur, IL 62525

Dear Ms. Irwin:

This letter will serve to document that, in 1995, U.S. EPA completed the remediation of an area of Schaeffer Road (just south of I-270 and immediately west of Illinois Route 3) that contained lead-bearing fill material derived from the NL Industries Superfund Site in Granite City, Illinois. The area was fully remediated and restored with clean backfill. Results from all confirmatory samples indicated that a cleanup level of 500 parts per million lead, which U.S. EPA considers protective of children's health at the Site, was achieved. The Schaeffer Road property was owned, in part, by the Illinois Power Company.

If you need any further information, please contact me at (312) 886-4742.

Sincerely,

  
Brad Bradley  
Remedial Project Manager
